Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 12-15, 20-26, and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sweeney et al (5,854,464). Sweeney et al show everything except utilizing the device in an all terrain vehicle comprising a frame, wheels, engine, and carburetor, and employing an adjustable clamp as the fastener. It would have been obvious to one having ordinary skill in the art to employ the device in an all terrain vehicle with the above mentioned elements, in order to improve fuel combustion in the engine. Note that all terrain vehicles including the above mentioned elements are conventional. In addition, adjustable clamps are a known alternative mechanical coupling mechanism to screw fasteners 32, such as the ones utilized in Sweeney et al, and as such it would have been prima facie obvious to substitute one known alternative for another. See MPEP 2144.06.

Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sweeney et al (5,854,464) in view of Will et al (5,284,122). Sweeney et al show everything except a thermostat disposed in the passageway. Will et al teach that it is old in the art to employ a thermostat 56, 62, in the passageway upstream and downstream of the carburetor heater. It would have been obvious to one having

ordinary skill in the art to modify Sweeney et al by employing a thermostat in the passageway upstream and/ or downstream of the carburetor heater, in order to monitor the heat exchanger temperature.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27, 31, 34-39, and 41 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sweeney et al (5,854,464). Note heating element 46 and thermal conductor 44 (see column 2, last few lines). Note that it would be inherent that the main body is formed of a heat conductive material, in order for the heating element to function.

Allowable Subject Matter

Claims 3-11, 28-30, 32, and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
